PROFILE

Seeking a **web developer**(front end) role in an industry with a professional working environment, this provides me an opportunity to utilize my skills and abilities and enriches my competences, thus fulfilling the vision of the organization.

PROJECTS

- | | |
|-------------------|---|
| 11/2020 – 07/2021 | GoPoolit 
<i>A global fundraising solution - Company project</i>
GoPoolit is a social media platform to raise funds from donars. I have worked in a team of 5 front-end web developers. Worked on React.js and Redux. |
| 04/2020 – 05/2020 | Book House - (Personal project) 
<i>A simple e-commerce site built using Node.Js, Express and MongoDB</i>
Book house is a simple e-commerce website in which user can sign up and buy books using stripe checkout which eventually adds the books to users shopping list. |
| 10/2020 – 11/2020 | Developer Connector - (Personal project) 
<i>A social media application where you can connect with developers and share posts.</i>
This application is built using React.JS with Node.JS backend and MongoDB as database. |
| 07/2020 – 08/2020 | Covid-19 Tracker- (Personal project) 
<i>A graphical representation of Covid-19 infections worldwide. The project is built using React JS and Material UI</i> |
| 2018 | Face Recognition and Detection using Open CV
<i>Engineering Final Year Group Project</i>
The project makes use of Open CV library of Python to detect and recognise human face which could be used in secured places. |
